

# CAPABILITIES STATEMENT

STRAITS MILLENNIUM SDN BHD (855986-D)

# CEO's Message

At Straits Millennium, we operate with the belief of trust and long-term relationship with our clients. “Our success is based on doing things better than our competitors.”

Times have changed in terms of doing business; companies are now collaborating with each other globally to move a project forward rather than handling everything themselves. In the industries we operate, we understand that time is very crucial.

SMSB, now, has taken the first step forward to a new growth stage. Our plan for expanding the business and growth focuses on fulfilling the economic targets of Malaysia through government and private sectors projects and services. Working with our partners in Malaysia and other countries will be the key to our success.

On behalf of the Management, I would like to thank all our customers, partners, employees and all stakeholders for the support that Straits Millennium is getting and will get in the future from them to reach our aspirations and strategic objectives.

Thank you.

Norresah Abu Samah  
Chief Executive Officer
